

OVERVIEW

Created in 1994, Thrive's Partnership Project (Partnership) is a truly unique and collaborative home visiting program that provides a support network to teen and young families with children ages 0-5 in the Gallatin Valley. Through home visits and personalized support, the Partnership staff work to foster confidence and self-sufficiency with the mothers and fathers in the program to create a strong foundation in which children can reach their full emotional, intellectual, social and physical potential. Partnership's strength-based programming works with families to reach self-identified goals.

Building on Strengths in Parents
